

H Series, Ultra-large Format Sheet Metal Laser Cutting Machine

Experience superior speed, safety, and cleanliness with the Bodor H series for effortless large format metal cutting.

The best choice for large format laser cutting

ENHANCED PROTECTION

The protective cover covering the crossbeam makes operation and the equipment safe. Thanks to the lightweight design, its stable inside mechanical structure guarantees speed in the mean time. *Non-standard versions with crossbeams of 4/5/6 meters do not have the protective cover.

ULTRA-LARGE FORMAT CUTTING

The 12m+N modular bed of the Bodor H Series features a completely separated worktable and bed design. This enables you to cut ultra-large sheets of 12m, 16m, 20m or longer, with high efficiency and precision.

SUPERIOR DURABILITY

The H series has a triangular ultra-high-pressure honeycomb design for the aluminum crossbeam, which combines light weight, strong rigidity, fast response, and low deformation. The crossbeam also has a protective cover for safety and stability.

Cutting Parameter AutoMatch

This function makes every user a "cutting master" by guiding you through parameter adjustments with ease.

Follow-up dust removal

Divides cutting area & uses fans to remove fumes in real-time for a cleaner workspace.

Active obstacle avoidance system

BodorGenius uses sensors and algorithms to detect potential obstacles like tilting parts and automatically avoids a potential collision.

Excellent bevel cuts

The bevel cutting option enables the production of +/- 45 degree bevel cuts, optimizing assembly procedures and subsequent welding.

Remnant layout

With uploaded pictures, the machine can automatically finish positioning and nesting, achieving material utilization rate at maximum.

Overheating offset

To stabilize laser beam focal point during the cutting process, this function counteracts the adverse effects of overheating by adjusting time and temperature. It is especially applicable to cutting thick sheet metal.

Intelligent pressure control

Based on the air pressure deviation feedback, X series automatically adjusts pressure without manual intervention.

Nesting software compatible with Tekla

Bodor's nesting software is compatible with Tekla. This combo together simplifies cutting processes with intelligent material utilization.

Technical specifications

	H3000	H4000	H5000
WORKING AREA (mm)	36500-8500*3200	36500-12500*4200	32500-12500*5150
LASER POWER (kW)	12/20/30/60/120	12/20/30/60/120	12/20/30/60/120
POSITIONING ACCURACY (mm/m)	±0.05	±0.05	±0.05
RE-POSITIONING ACCURACY (mm)	±0.03	±0.03	±0.03
MAX. ACCELERATION (G)	0.8	0.8	0.8
MAX. LINKAGE SPEED (m/min)	80	80	80

* Certain functions or components mentioned in this document are optional and may not be included in the standard version of the product.

Global No.1 in Sales Volume for 7 Years

2019 – 2025

Bodor has consistently held the top position in global sales volume of laser cutting machines with 1000W and above power for 7 consecutive years. In 2025, we are poised to continue our upward trajectory, solidifying our position as a market leader and surpassing our previous achievements.

5 Years of Premium Warranty

For three Bodor core components

Bodor's integrated approach reduces failure rates, ensuring quality in transportation, delivery, and maintenance of three Bodor core laser components. Simplified operation, adjustment, and maintenance streamline processes, while expert machine setup and training facilitate smooth equipment adaptation for customers.
